RODRIGO ANDRÉS MORÁN FIGUEROA

Full Stack Developer with skills in JavaScript, Typescript, React.js, React Native, Python, Node.js and LLMs. I excel in teamwork and thrive in solving complex problems. Proficient in Agile methodologies (Scrum, Kanban) and tools like Jira and Trello. I derive satisfaction from creating clean, well-structured, and scalable code, with thorough comments to facilitate team collaboration. I possess excellent communication skills and I am committed to continuous personal and professional growth. I am seeking remote or hybrid roles as a Full Stack Developer in Web, Desktop or mobile Apps.

- ✓ Excel

EXPERIENCE

AAK TELE-SCIENCE, INC. (May 2023 – Present)

Front-End Developer: React | Typescript | Styled-Components | React Query | Python | ReactStrap | Electron | Recoil | NodeJs | React-Router | Yup

- Mastered functional component creation, expertly integrating endpoints for robust functionality.
- Rapidly assimilated new packages, seamlessly integrating them into the web application.
- Successful creation of the company's first Electron application prototype.
- Exemplified commitment and work ethic, rapidly entrusted with task creation and peer reviews.
- Demonstrated full autonomy in development with high adaptability, punctual task completion, and adherence to guidelines.
- Consistently suggested innovative solutions that were incorporated and met with positive feedback.
- Fostered a dynamic and productive work environment, enhancing team synergy and cooperation.

NASA API (March 2023 – May 2023) 6 Sprints

Back-End Developer: NodeJs | Express | MongoDB | React | Jest | Rest API
github.com/Rom1893/NASA-project

CampingSite (June 2022 – August 2022) 8 Sprints

Full-Stack Developer: JavaScript | NodeJs | MongoDB | Express | Bootstrap | Joi
github.com/Rom1893/Campingsite Demo: [/CampingSite](#)

React CoLoRPicker (November 2022 – December 2022) 4 Sprints

Front-End Developer: React | Material-UI | useContext
github.com/Rom1893/PalettesProject Demo: [/ReactCoLoRPicker](#)

- I designed and developed an API and 2 complete websites. The first based on Flat UI, Material-UI and the second on Yelp website.
- The websites provide an intuitive and enjoyable experience for users, allowing them to explore, select, and create Palettes and Camping Spots.
- Established user authentication with securely stored credentials in MongoDB ensuring the integrity of user-entered information.
- API on the other hand has scalable and RESTful architecture.
- Successfully deployed the websites on render.com, ensuring their availability online.
