RODRIGO ANDRÉS MORÁN FIGUEROA

Frontend Developer with skills in React.js, Typescript, Redux, React Native, Electron, and Node.js. I excel in teamwork and thrive in solving complex problems. Proficient in Agile methodologies (Scrum, Kanban) and tools like Jira and Trello. I possess excellent communication skills and I am committed to continuous personal and professional growth. I am seeking remote roles as a Frontend Developer in Web, Desktop or mobile Apps.

- ✓ Styled-Comp.
- ✓ React Native
- ✓ Atomic Design
- ✓ Node.Js
- ✓ MongoDB
- ✓ Git & GitHub
- ✓ Docker

Tools:

- ✓ Electron
- ✓ Trello
- ✓ Scrum
- ✓ Jira
- ✓ Heroku
- ✓ Netlify
- ✓ ChatGPT
- ✓ Vercel
- ✓ Figma
- ✓ Excel

EXPERIENCE

AAK TELE-SCIENCE, INC. *(May 2023 – Present)*
Front-End Developer: React | Typescript| Styled-Components | React Query | Atomic Design | ReactStrap | Electron | Recoil | NodeJs | React-Router | Yup

- Mastered functional component creation, expertly integrating endpoints for robust functionality.
- Rapidly assimilated new packages, seamlessly integrating them into the web application.
- Successful creation of the company's first Electron application prototype.
- Exemplified commitment and work ethic, rapidly entrusted with task creation and peer reviews.
- Demonstrated full autonomy in development with high adaptability, punctual task completion, and adherence to guidelines.
- Consistently suggested innovative solutions that were incorporated and met with positive feedback.
- Fostered a dynamic and productive work environment, enhancing team synergy and cooperation.

NASA API *(March 2023 – May 2023) 6 Sprints*
Back-End Developer: NodeJs | Express | MongoDB | React | Jest | Rest API
github.com/Rom1893/NASA-project

CampingSite *(June 2022 – August 2022) 8 Sprints*
Full-Stack Developer: JavaScript | NodeJs | MongoDB | Express | Bootstrap | Joi
github.com/Rom1893/Campingsite Demo: /CampingSite

React ColorPicker *(November 2022 – December 2022) 4 Sprints*
Front-End Developer: React | Material-UI | UseContext
github.com/Rom1893/PalettesProject Demo: /ReactColorPicker

- I designed and developed an API and 2 complete websites. The first based on Flat UI, Material-UI and the second on Yelp website.
- The websites provide an intuitive and enjoyable experience for users, allowing them to explore, select, and create Palettes and Camping Spots.
- Established user authentication with securely stored credentials in MongoDB ensuring the integrity of user-entered information.
- API on the other hand has scalable and RESTful architecture.
- Successfully deployed the websites on render.com, ensuring their availability online.

EDUCATION

Biochemistry Universidad De Chile [2013-2022]
GPA: 3.7

The English Institute [2000-2011]
Elementary, Middle and High School.

LANGUAGES

Spanish / Bilingual - Native
English / Bilingual - Native
